DOUBLE MONOFILAMENT/ HAND TIED BACK	Hand tied top (Mono), hand tied back	Multi-directional parting / Appearance of scalp / Mimics natural hair movement
FRENCH DRAWN TOP/ HAND TIED BACK	Hand tied French drawn top (Swiss lace/Glass silk), hand tied back	Multi-directional parting / Appearance of scalp, knots are hidden / Mimics natural hair movement
EVOLUTION	Hand tied top (Double Swiss Lace), hand tied & injected (PU) back	Natural hairline / Multi-directional parting / Mimics natural hair movement

JON RENAU | EASHAIR

BASE MATERIAL	HOW HAIR IS APPLIED	BENEFITS
WELDED LACE	Hand tied (ventilated)	Allows multi-directional parting; natural looking hair line. Most durable lace
SWISS LACE	Hand tied (ventilated)	Allows multi-directional parting; natural looking hair line. Softer, more delicate lace
SINGLE MONOFILAMENT	Hand tied (ventilated)	Allows multi-directional parting; natural looking growth at part
DOUBLE MONOFILAMENT	Hand tied (ventilated)	Allows multi-directional parting; natural looking growth at part with glass silk underneath to give the appearance of scalp
GLASS SILK	N/A	Knots are hidden in between two layers of glass silk to give the appearance of scalp
FRENCH DRAWN MONOFILAMENT	Hand tied (ventilated)	Allows multi-directional parting; the MOST natural looking growth at part; knots are hidden in between two layers of glass silk to give the appearance of scalp
100% HAND TIED STRETCH	Hand tied (ventilated)	Mimics natural hair movement, features a natural density
WEFT (WEFTED)	Sewn in to create weft	Allows for faster production, (i.e. less labor & cost) provides more density and durability
POLYURETHANE	Injected, v-looped, hand tied	Allows base to be bonded; usually clear or flesh toned. Also used to coat the edges of monofilament toppers for durability (PU coated). Also available in sheets
SILICONE	Injected, V-looped, Hand Tied (ventilated onto material, coated with silicone)	Allows base to grip against bare skin; no biological hair is present. Also available in sheets

*Only available in Evolution Cap
